STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

PAVILLION
DELTA 825 ASH
HALF
SANDSTONE

Three way blend of large quartz based pebble, brown/grey granite and a peppering of small dark bluestone set in an ash and half sandstone pigment base

Things you should know

Warm beige and brown with small bluestone aggregate makes for distinctive contrast. The Sandstone pigment intensifies the earthy brown hues in the projected colour.

One of the key stones used in this product can at times be difficult to source. Availability is often restricted when demand exceeds the quarry's ability to supply. Please check with us before commencing your next project.
