STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

RIO DELTA ICE 28 BLACK

Reminiscent of the night sky. Intense black stone with ash and black pigment base offset with a highlight of crushed white quartz.

Things you should know

The bluestone used in this product is sourced from a major high production hard rock quarry within the greater Melbourne area. The visual nature of the stone varies from time to time and is not a controllable aspect of the product. The variation takes the form of brown coloured particles deviating away from the predominantly black ones.

White quartz is a rare resource and availability is often restricted when demand exceeds the quarry's ability to supply.

SPECIFICATION:

Vic Mix Rio Delta Ice 28 Black
25MPa Exposed Aggregate
Concrete

ORDER CODE:

X_RIODI28BK
