STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.

PRODUCT NAME:

## ZAMBIA DELTA 334 BLACK

Large and small black stones set in an ash and black pigment base and punctuated by a distinctive bronze/grey granite

### Things you should know

Classic dark pavement with silvery bronze hues.

Originally conceived as an alternative to Zambezi Black to overcome supply issues with the brown granite elements of the product. Now a stand-a-lone item. Its brighter and sharper appearance is often favoured over the original more subdued tones of Zambezi Black.

Other related products to look at are:  
Zambezi Delta 334 Black and  
Sierra Black

SPECIFICATION:

Vic Mix Zambia Delta 334  
Black 25MPa Exposed  
Aggregate Concrete
