STONE CHARACTERISTICS OUTSIDE PHOTO RANGE MAY VARY

PRODUCT NAME:

AMBER ASH

unique blend of amber, orange brown, black and white semi-crushed pebbles set in a grey cement base.

Things you should know

Amber orange, brown and grey hues dominate the projected colour and sits very comfortably with brown exterior brickwork.

The nature of the pebble used in this product is that it often contain fine dust similar in colour to the stone from which it is derived. The dust acts somewhat like a pigment and can affect the colour hue of the grey cement base.

The inclusion of a mineral oxide pigment of your choice can further enhance the base colour.

SPECIFICATION:

Vic Mix Amber Ash 25MPa
Exposed Aggregate Concrete

ORDER CODE:

X_AMBAS

REVISION: 23/12/2016

There are likely to be variations in consistency of colours and textures, appearance and quality in the finished product of the hardened concrete, as the raw ingredients are natural and subject to variations beyond our control. Whilst every effort has been made to match the colours in the preparation of this document, reproductive processes will alter the actual appearance in the concrete products to varying degrees.

The concrete samples shown are indicative only of the finished concrete product, and no guarantee of the colours or textures of the product is given or implied by this document.
